

Service Point for Job Market Integration (SAI)

- Did you grow up in a country other than Germany?
- Have you gained job experience in another country?
- Do you live abroad or in Saarland?
- Are you eager to demonstrate your skills?

SAI will help you find a rewarding new career path. First you take a theoretical and practical test measuring your knowledge and abilities (skills assessment). Then you receive a certification of your qualifications, which you can include with your job applications.

Additionally, this will allow you to see what kind of qualifications you may still need. The results can also be incorporated into a process for official recognition of your foreign professional qualifications. This will increase your chances over the long term for a brighter professional future.

Skilled workers and entrepreneurs

- Have you immigrated or would you like to immigrate to Germany and have questions about entry, staying here, or working?
- Are you an employer seeking skilled workers from abroad for your company?
- Do you need assistance with the organization of your business or dealing with government agencies?

We offer a number of services aimed at advising and assisting immigrants and businesses.
